Highlights

These are unprecedented times - there's been an overnight shift to remote working for almost the entire population.

Many businesses are furloughing staff and it remains to be seen how many businesses will re-open on the other side.

Long established laws are being suspended and re-written overnight in order to help businesses survive. The onus to unravel and re-establish what is left will fall on FIRE practitioners.

We will be looking at the current issues in a quickFIRE format from across the spectrum of asset recovery practitioners.
