

ICC YAF: Gas Disputes in a Nutshell

17.06.2021 (16:00 – 17:30 / GMT +3)

Objective

Gas disputes are very likely to be referred to arbitration. They are particular and highly technical in the sense of procedure and substance.

The purpose of the webinar is to address the particulars of gas disputes. The global gas market, types of the contracts subject to the disputes, impact of Covid-19, settlement of the disputes via ADR methods and finally via arbitration will be the main point of discussions. Distinguished and experienced panellists in the field, will provide tips how to effectively manage an arbitration process in gas disputes.

Who should attend

All young arbitration and ADR practitioners, regardless of their professional background.
